 CHERRIES, SOUR - Prunus cerasus - select from the following varieties - Moderately drought tolerant, blossoms/fruit often freeze because of a short heat requirement after chilling

Montmorency

 CITRUS, SATSUMA - Citrus spp - select from the following varieties - not winter hardy so have to be grown in 20 gallon container and move indoors for temperatures below 26 degrees F Brown Select, Miho, Owari, Seto

- 6. **FIGS -** Ficus spp select from the following varieties **Moderately drought tolerant** Celeste, Texas Everbearing
- 7. **GRAPES, AMERICAN -** Vitis spp select from the following varieties **Moderately drought tolerant**, these varieties are resistant to Pierce's disease **Black Spanish, Champanel**
- 8. **GRAPES, HYBRID -** Vitis spp select from the following varieties **Moderately drought tolerant**, this variety is resistant to Pierce's disease **Blanc Du Bois**
- GRAPES, HYBRYD SEEDLESS TABLE Vitis spp select from the following varieties -Moderately drought tolerant, these varieties are more susceptible to Pierce's disease and will usually die after a few years

Flame, Reliance, Himrod, Glenora

 JUJUBES - Ziziphus jujube, select from the following varieties - Moderately drought tolerant

Li, Lang

11. **PEACHES -** Prunus spp - select from the following varieties - **Moderately drought** tolerant, ripen dates in parenthesis

Bicentennial (very early season)
Surecrop, Sentinel, Ranger Harvester (early season)
Redglobe, Milam, Majestic, Denman, Loring, Belle of Georgia (midseason)
Dixiland, Redskin, Jefferson (late)
Frank, Fayette, Ouachita Gold (very late)

12. **PEARS -** Pyrus spp - select from the following varieties - **Moderately drought** tolerant

Orient, Moonglow, Warren, Magness, Kieffer, LeConte, Ayres, Garber, Maxine

13. **PEARS, ASIAN -** Pyrus spp - select from the following varieties - **Moderately drought** tolerant

Shinseiki, 20th Century, Hosui

14. PECANS - Carya illinoensis - select from the following varieties - Moderately drought tolerant

Sioux, Pawnee, Desirable, Caddo, Cape Fear, Kanza, Hopi, Nacono

15. **PERSIMMONS**, **ORIENTAL** - Diospyros virginiana - select from the following varieties - **Moderately drought tolerant** 

**Eureka, Hachiya, Taninashi, Tamopan, Great Wall, Izu** (fruit of these varieites is astringent)

**Fuyu** (more susceptible to freezing but less astringent)

16. PLUMS - Prunus spp - select from the following varieties - Moderately drought tolerant

Morris, Methley, Ozark Premier

17. **RASPBERRIES** - Rubus spp - select from the following varieties - **Moderately** drought tolerant

**Dorman Red Variety** 

18. STRAWBERRIES - Fragaria spp - select from the following varieties - Moderately drought tolerant, for best results, cover with mulch when temperatures drop below 15 degrees F

**Chandler** (annual variety)

Sunrise, Cardinal, Allstar (perennial, ever-bearing varieties)

 WALNUTS – Jugluns spp - select from the following varieties - Moderately drought tolerant

Fately, Reda
